Apple Education

Get Set Up for Classwork

The Classwork app lets teachers easily assign anything from worksheets to activities in educational apps, see student progress and collaborate with students in real time. Complete the steps below to get teachers and students set up with Classwork:

1. Enrol in or upgrade to Apple School Manager.

Apple School Manager is a simple, web-based portal that lets IT administrators manage people, devices and content. You can provide Managed Apple IDs, set up devices, get apps and books, and empower teachers with tools to create engaging learning experiences — all from one place. Learn how to enrol in or upgrade to Apple School Manager.

2. Set up accounts for teachers and students.

Using Apple School Manager, you can quickly create accounts to give students access to Classwork and other key Apple services — along with 200GB of free iCloud storage — while meeting the privacy needs of your school. **Tip:** When you connect Apple School Manager with your school's Microsoft Azure Active Directory for federated authentication, students and teachers can use their existing credentials to sign in. Learn more about creating accounts using Federated Authentication, SIS Integration or SFTP.

3. Set up classes for Classwork.

Classes included in SIS or SFTP connections will automatically create Classwork classes for you and are automatically updated as students move in and out of classes. You can also allow teachers to create, edit and delete their own classes right within Classwork by enabling the "Create, edit and delete classes" privilege for the instructor role in Apple School Manager.

4. Get the Classwork app in Apps and Books in Apple School Manager.

Apple School Manager and your MDM work together, so you can get app licenses in bulk. Make sure devices are updated to iPadOS 13.5 or later, then assign and install Classwork on teacher and student devices remotely. Learn more about Apps and Books in Apple School Manager.

5. Enable student progress for your organisation in Apple School Manager.

Instructors can see how students are doing on assigned activities in any ClassKit-enabled app when the student progress feature in Classwork is enabled. You can still use Classwork even if you don't enable this feature. **Tip:** Look for the "Works with Classwork" badge in the Apps and Books area of Apple School Manager to find ClassKit-enabled apps that support student progress in Classwork. Learn how to enable student progress.
